**Organization Mission:**

Advocating for equity in college access and success since 2010. Driven by our mission to increase the number of students completing post-secondary opportunities, the Tennessee College Access and Success Network aims to establish a college-going culture across the state. We work to remove barriers to higher education, promote college persistence, and increase post-secondary completion. Our focus is on connecting leaders, advocating for access and completion, and increasing capacity.

**Types Of College Access Services Offered:**

TCASN founded and manages The TalentED Project to help first-generation, lower-income students nationwide identify and enroll in good-fit colleges. We advocate at the local, state, and federal levels for our students to have better access to higher education and more supports to help them succeed once in college. We provide technical support and professional development offerings to our member organizations.

**Academic Setting:**

We work all across Tennessee including Appalachia, Middle Tennessee, and the Delta. Our work covers rural, suburban and urban areas of the state.

**Student Demographics:**

We aim to provide support to all organizations serving underrepresented students of any kind - first-generation, lower-income, students of color, rural students, adult students, students with special needs, etc.
